

# AIREX-L

## AIR ENTRAINING AGENT FOR CONCRETE

### DESCRIPTION

**AIREX-L** is a liquid solution of hydrocarbons used as an air entraining agent for concrete and complies with ASTM C260. When AIREX-L is added to the concrete mix, it produces a system of microscopic air bubbles that remains very stable in the concrete. The entrainment of air with AIREX-L improves ease of placement, workability and durability of the concrete while minimizing bleeding and segregation.

### FEATURES/BENEFITS

AIREX-L can be used in all normal density concretes as well as low slump concretes where resistance to cycles of freezing and thawing is required. AIREX-L is specifically designed to facilitate air entrainment of low slump and no slump concrete.

### TECHNICAL INFORMATION

#### Physical Properties

Specific gravity (25° C)	1.007
% of solids by weight	5.0
pH	11.0

Consult your EUCLID representative for additional information or technical assistance.

### PACKAGING

AIREX-L is available in bulk as well as in containers of 1000, 205 or 20 liters.

### SHELF LIFE

2 years in original, unopened package.

### SPECIFICATIONS/COMPLIANCES

- AIREX-L meets all requirements of ASTM C 260 specifications.
- AIREX-L is approved by the Quebec and Ontario Ministry of Transportation.

### DIRECTIONS FOR USE

For normal slump concrete use a minimum of 15 mL/100 kg of cementitious material.

For dry concrete (0 to 50 mm slump), use a minimum of 100 mL/100 kg of cementitious material.

For roller compacted concrete (RCC), use 300 to 500 mL/100 kg of cementitious material.

AIREX-L should be added with the mix water or independently of other admixtures. Concrete mixing should ensure adequate dispersion of admixtures.

The quantity of AIREX-L required to obtain the specified air content may be influenced by the following factors:

- Concrete and ambient temperature
- Cement types
- Mineral additives
- Quality of aggregate
- Sand gradation
- Slump of concrete
- Mixing equipment

## PRECAUTIONS/LIMITATIONS

---

- Keep from freezing
- AIREX-L is not W.H.M.I.S. regulated.
- In all cases, consult Safety Data Sheet before use.

AIREX-L can be used and is compatible with the full range of EUCLID admixtures. When EUCON 37, EUCON 537 or PLASTOL 5000 are added to concrete, the use of AIREXTRA in replacement of AIREX-L is recommended for a more stable air void system and enhanced performance of the concrete.

Rev. 11.14

**WARRANTY:** The Euclid Chemical Company ("Euclid") solely and expressly warrants that its products shall be free from defects in materials and workmanship for one (1) year from the date of purchase. Unless authorized in writing by an officer of Euclid, no other representations or statements made by Euclid or its representatives, in writing or orally, shall alter this warranty. EUCLID MAKES NO WARRANTIES, IMPLIED OR OTHERWISE, AS TO THE MERCHANTABILITY OR FITNESS FOR ORDINARY OR PARTICULAR PURPOSES OF ITS PRODUCTS AND EXCLUDES THE SAME. If any Euclid product fails to conform with this warranty, Euclid will replace the product at no cost to Buyer. Replacement of any product shall be the sole and exclusive remedy available and buyer shall have no claim for incidental or consequential damages. Any warranty claim must be made within one (1) year from the date of the claimed breach. Euclid does not authorize anyone on its behalf to make any written or oral statements which in any way alter Euclid's installation information or instructions in its product literature or on its packaging labels. Any installation of Euclid products which fails to conform with such installation information or instructions shall void this warranty. Product demonstrations, if any, are done for illustrative purposes only and do not constitute a warranty or warranty alteration of any kind. Buyer shall be solely responsible for determining the suitability of Euclid's products for the Buyer's intended purposes.
