

EUCLID CHEMICAL

PROJECT PROFILE

BLACK OAK CASINO RV PARK

PROJECT DATA

Location – Toulumne, CA

Application – Macro-Synthetic Fiber Reinforced Concrete Pavement

Contractor – Tuolumne Economic Development Authority, Inc. (TEDA, Inc.)

Concrete Producer – L.K. Lehman Trucking dba A & L Ready Mix, Sonora, CA

Applicator – Tuolumne Economic Development Authority, Inc. (TEDA, Inc.)

Total Area – 206,400 ft² (19175 m²)

PRODUCTS FEATURED

TUF-STRAND SF

Macro-Synthetic Fiber

EUCON X15

Mid-Range Water Reducing Admixture

EUCON AEA 92

Air Entraining Agent For Concrete

SCOPE OF PROJECT

- 6 in concrete pavement for RV parking and site access lanes.

PROJECT SUMMARY

Black Oak Casino located in Tuolumne, CA is owned and operated by the Tuolumne Band of the Me-Wuk Indians. When making the choice for RV parking and access lanes for the project, they chose Portland Cement Concrete. Having prior experience with TUF-STRAND SF, they chose to use it for temperature and shrinkage crack control. When asked why they chose TUF-STRAND SF over conventional steel reinforcement, TEDA, Inc.'s project manager Kip Wivell stated, "We used TUF-STRAND SF on another project recently on the recommendation of our concrete supplier and liked the time and labor savings of having the reinforcement in the truck. We liked the idea of not having to purchase and tie steel. When we discussed the options with the project team, TUF-STRAND SF was the logical choice."
